

# Pump Track Challenge

## Format and Rules

1

### Time Trial Qualifiers format

- Combined time – one run on each course.
- Time permitting - riders will have the option to do 1 rerun of either of their 2 runs. If a rider elects to do a rerun (for whatever reason), that run time will count regardless if the previous time was better.

2

### Finals

- Top 32 men advance to Elimination Finals. Women will be 8 or 16 depending on the total number of entrants
- Finals will have a double elimination format: 1 run on each course. Winner of the head-to-head heat advances to next round.
- Ties will be broken as follows: the winner of the last run is the overall winner of the heat

**Maximum Differential:** A maximum differential will be established – calculated as 10% of the average Seeding Run time. A rider may lose a run by no more than the maximum differential.

### Rules

Bike chain removed.

Riders must not enter the other rider's course.

Both wheels must stay on the legal side of any gate or stubby. In the event of a rider being airborne, the rider's wheels must stay on the legal side of the imagined vertical line above the gate.

A reaction-start using a start gate will begin each run / heat. The actual times and time differentials will be recorded by an electronic timing eye at the finish.

**CRANKWORX**
